Proudly pumping → since 1974

Our company

Since 1974, we have been working to become the fluid technology experts that we are today. More than 50 years manufacturing equipment for the transfer, filtering, measurement and control of fuels, AdBlue/DEF, lubricants and other automotive fluids. Equipment that have become a benchmark in our sector.

Designed and manufactured
→ in Spain

Our factory and offices are located in Balaguer (Lleida), Spain. The integration of all the productive processes gives us a global view of the product and an effective quality control in each of the processes.

Offices

Commercial Department / A commercial team, strategically located by the geography, offering a close, customised and efficient service along with the back office support.

After Sales / Call center available working with both mechanical and software queries. We offer immediate and customised service to all our network of distributors and customers.

Technical Office / The continuous improvement of the manufacturing and quality processes are our formula to get the excellence. The technical team offers consultancy to adapt the equipment to our customers' requirements.

Development / A professional team with a great expertise and high technical qualifications devoted to the development of different technologies according to the specific requirements of each application.

R&D / Our engineers are always researching and developing new equipment, types of software and firmware. Always at the cutting-edge of our sector.

Factory

Plastic Division / Different machines to hold moulds up to 250 tonnes.

Painting Division / Two painting sections: liquid and powder, offering the possibility of customising our manufactured products.

Machining Division / We have CNC machinery of last generation assuring the maximum accuracy of the manufactured.

Assembly Division / Meticulous technical staff is responsible of the manufacturing process, testing 100% of the equipment to guarantee their maximum quality.

Division of Moulds and Tools / We design, manufacture and rectify our own moulds and tools to speed up the processes.

Laboratory / We perform stress tests, calculation of performance, evaluation of prototypes and new products.

Metal Division / We close the whole circuit of the sheet treatment: laser cutting machine, punching machine, bend machine and welding machinery.

Custom solutions to
→ suit your needs

There are needs that are not solved in the market. Our R&D department and our in-house manufacturing team can design and develop the equipment that effectively meet your objectives. We can develop tailor-made software, electronics, chassis and mechanical elements.

IRON-50 110/230 VAC

50 l/min

0.25 kW

F1" BSP

Self-suction - self-priming pump with self-adjusting blades and recirculation bypass and anti-rust treatment.

TECHNICAL DATA

Free flow:	50 l/min
Motor:	0.25 kW · 50/60 Hz · self-ventilated
Operation:	S1 continuous
Motor speed:	3,000 rpm (50 Hz) · 3,600 rpm (60 Hz)
Protection:	IP-55
Max. suction length:	2.7 m
Connection:	F1" BSP threads and flanges
Dimensions (approx.):	225x146x185 mm
Net weight (approx.):	8.5 kg

PACKAGING

Ⓢ	180x240x260 mm LxWxH (approx.)
Ⓢ	9.1 kg (approx.)
Ⓢ	100 units / pallet (EUR-pallet)

COMPONENTS

- › 3 m electric cable with approved plug
- › ON/OFF luminous switch
- › Stainless steel filter of 350 µm

07 / Manual pumps & drill pump

BP-5 · Manual lever pump

Manual lever pump for the transfer of diesel or lubricant from metallic drums of 50 to 200 litres.

TECHNICAL DATA

Transfer capacity: 300 ml x piston-stroke

COMPONENTS

- › Pump made of steel, aluminium, zinc, brass, NBR
- › 870 mm metallic suction telescopic tube with 3/4" connection to the pump
- › 1 1/2" or 2" connection adaptable to metallic drums from 50 to 200 litres

	Fluids	
BP-5 · Manual lever pump		040100000

TMG · Manual bellow pumps

Bellow pumps made of polyethylene for the transfer of diesel, petrol, water and other chemical products and/or solvents.

TECHNICAL DATA

Flow: depending on the piston-stroke

MODELS

- › TMG-040 suitable for the refuelling of kerosene stoves
- › TMG-080
- › TMG-150 flexible pump suitable to put in the vehicles tanks

	Flow	Tube	Fluids	
TMG-040	6 l/min	0.4 m · 50-litre drums		040600000

TMG-150	6 l/min	1.5 m · flexible		040400000

BMP · Manual piston pump

Manual piston pump of double action suitable for diesel, oil, fuel and alcohol.

TECHNICAL DATA

Transfer capacity: 800 ml x piston-stroke

Inlet · Outlet connection: 1" · 3/4"

COMPONENTS

- › 2.5 m Ø3/4" hose
- › Drum plug adjustable at 2"
- › 1 m Ø33.5" suction tube
- › Heavy-duty steel handle
- › Nozzle hanger

	Fluids	
BMP · Manual piston pump		040200000

BRM-88 ·
Rotary aluminium pump

Self-suction rotary blade pump. Adaptable to drums from 50 to 200 litres.

TECHNICAL DATA

Transfer capacity: 2.85 L x 20 rounds
Net weight (approx.): 6.6 kg

COMPONENTS

- › 970 mm Ø32 mm suction tube
- › Ø25 mm discharging pipe
- › M2" adapter adjustable in height fo the drum fixation
- › Aluminium die casting steel handle

11 / Electronic displays

Gespasa electronic displays can be connected to a pump or solenoid valve to display the volume being supplied or the total volume supplied. We have three display models in order to suit the needs of your installation.

Display E

5 or 7 digits

reset & total

Liquid crystal digital display and tropicalised electronics.

TECHNICAL DATA

Partial:	5 digits
Total:	7 digits (scroll mode)
Display integers and decimals:	999.99 / 999.9 / 99999
Input channels:	1 or 2 channels (90° or 180°)
Dimensions (approx.):	250x150x300 mm
Net weight (approx.):	4.15 kg

COMPONENTS

- › RESET & TOTAL buttons
- › Button battery of long duration (approx. 4 years)
- › Non volatile memory to save calibration parameters and litre totaliser

Display GE 12/24 VDC ·
110/230 VAC

6 digits preset

Liquid crystal digital display. Preset the volume to be supplied, connecting it to a pump and/or solenoid valve. It shows the partial and total of the supplied volume.

TECHNICAL DATA

Partial:	6 digits
Total:	6 digits
0.00 to 9999.99 volume:	2 decimals are shown
10000.0 to 99999.9 volume:	1 decimal is shown
≥ 100000 volume:	No decimal is shown
Input channels:	1 or 2 channels (90º or 180º)
Dimensions (approx.):	250x150x300 mm
Net weight (approx.):	4.15 kg

COMPONENTS

- › x1 & x10 buttons to preset the volume to be supplied
- › Connection to an external switch or nozzle holder
- › Connection to a GK-7M controller through the RS-485 communication bus and the GESPASA communication protocol
- › Signal amplifier output for connection to a display or external controller

11 /

GK-7Plus + metal box	25336-CF00000

12 / High flow meters

P. 26 → High flow pumps

- Ⓢ DIESEL
- Ⓢ PETROL
- Ⓢ LUBRICANT

GESPASA meters of positive displacement (PD) of rotary movement, for the measurement in the transfer of fuels and industrial fluids. Maximum accuracy in the measurement. Minimum pressure drop. They hold the accuracy because of its measuring chamber with a minimum friction.

- 1

Degasser

› The air eliminator must be under pressure, it cannot be empty
- 2

Cumulative counter

› Non-resettable

› Counter of 8 digits
- 3

Counter

› Mechanical resettable

› Counter of 4.1 digits
- 4

Mesh prefilter

› Prefilter of mesh 80 for diesel

› Optional of mesh 40
- 5

Aluminium body

› Suitable for fuel-oil, diesel, fuel, kerosene, ethylene glycol, motor oil and ink

› Stainless steel version available

Optional
Ticket printer
Mechanical preset
Electronic preset
Pulser with or without mechanical register
GE · Electronic display with signal output
GK-7 · Supply control

M-Meters with dessager and prefilter

12 /
High flow meters

25-3,000 l/min

±0.2% accuracy

15 / Single-stage filters

The assembly of filters in parallel allows to configure a filter with the flow and diameter you need. It is advisable to install a filter with a higher flow than the pump flow. The higher the maximum filter flow is, better filtration efficiency. The longer the fluid is in contact with the filter cartridge, the more particles are retained. Customised configuration according to your needs.

- Ⓢ BIODIESEL

To assembly in-line the filters extends the life of the filtering elements, is more profitable and doubles the filtration efficiency. The single-stage filters retain the bigger particles, preventing from excessively clogging the next filters of better efficiency. Customised configuration according to your needs.

TECHNICAL DATA

Pulser accuracy:	±0.5 %
Dimensions (approx.):	405x460x415 mm
Net weight (approx.):	22.5-39.5 kg

COMPONENTS

- › MGI-110 Pulser · 90° Hall Effect
- › Display GK-7Plus
- › GK-7Plus controller of users and vehicles that communicates with the DieselPlus cloud software
- › Keypad that allows to preset the amount to be supplied and to introduce the user identification code
- › 60-user/vehicle · 1,000 services memory included by default (other memories available)
- › Identification key reader iButton included by default (other identification systems available)

M1" Complete long union flange kit	800003027
Optional	
STAINLESS filter-sieve · 350 µm Ø33 mm	460000003

Aluminium flange kit

Aluminium flange for the quick coupling of the pump and/or pipe to any type of installation.

COMPONENTS

- › Flange
- › DIN.912 ALLEN screws
- › Joint

F1" BSP Aluminium flange kit	800003022
F1" NPT Aluminium flange kit	800003062
F1" NPT Aluminium flange kit with O-ring housing	800003069

Aluminium 90° elbow kit

Aluminium elbow flange for the quick coupling of the pump and/or pipe to any type of installation.

COMPONENTS

- › Flange
- › Screws
- › Joint

90° Elbow kit	800003041
---------------	-----------

Nozzle hangers

Nozzle hangers made of PA+fibreglass adaptable to different models of automatic nozzles. Available with micro-switch to make the automatic stop of the pump when the nozzle is hung.

PA Nozzle hanger	280403001
PA Nozzle hanger + Micro-Switch	280403101
PA Nozzle hanger + EExe Micro-Switch	280403201

Pedestal bases

1 m hexagonal pedestal base made of sheet for the own consumption controllers and the supply kits.

Pedestal base for GK-7	800400013
Pedestal base for COMPACT	800400015

Wall support

Zinc-plated sheet support easy to install and to fix on a wall. Its nozzle hanger allows you to hang the nozzle securely.

TECHNICAL DATA

Material:	Zinc-plated sheet
Dimensions (approx.):	290x47x410 mm
Weight (approx.):	2.3 kg

COMPONENTS

- › "Easy lock" nozzle hanger
- › Nozzle lock through padlock (padlock not included)

Galvanised universal wall support	800404086
-----------------------------------	-----------

Universal support

Support to fix the pumping kits in the polythene tanks of 1,000 litres with metallic framework and the steel double wall tanks. It can also be fixed on the wall.

TECHNICAL DATA

Material:	Zinc-plated sheet
Dimensions (approx.):	330x90x280 mm
Weight (approx.):	2 kg

COMPONENTS

- › Nozzle hanger
- › Rubber protection
- › Drip pan

Universal support	800404259
-------------------	-----------

Polythene tank platform

Sheet platform to install the pumping kits on the tanks.
Treatment to maximise corrosion protection.

Polythene tank platform	800400002
-------------------------	-----------

31 /
Accessories

Bases for the supply kits

Bases to put the pumping kits and to fix on the wall or on any surface.
Treatment to maximise corrosion protection.

TECHNICAL DATA

Material: Steel sheet
Weight (approx.): 6 kg

COMPONENTS

- › Nozzle hanger
- › Rubber protection

	Dimensions (approx.)	
Base no. 3	320x260x527 mm	800400001
Base no. 4	392x300x325 mm	800400011

Cabinets for external use

Cabinets to put and protect the pumping kits.
Treatment to maximise corrosion protection.

TECHNICAL DATA

Material: 1.5 mm steel sheet

COMPONENTS

- › Opening under the door to pass the hose
- › Key locking
- › Models available with nozzle hanger and pump support with anti-vibration system (AS-5P)

	Dimensions (approx.)	
AS-2	470x265x500 mm	510000000
AS-3	445x270x400 mm	520000000
AS-5B	620x300x580 mm	550000000L
AS-5P nozzle hanger	620x330x585 mm	550700000
AS-5P nozzle hanger + micro-switch	620x330x585 mm	550800000

«Breakaway» fireproof valves

Designed to be installed in fuel supply hoses and they will be disconnected when there was a strong pull. They automatically stop the flow of fuel. Designed to be replaced after separation.

COMPONENTS

- › Alumium body
- › Viton main seals
- › Stainless steel main spring
- › POM guide and poppet
- › PVC protective sleeve

	Flow	Connection	
802 «Breakaway» valve	0-60 l/min	BSP 3/4"xBSP 3/4"	805604016
804 «Breakaway» valve	0-120 l/min	BSP 1"xBSP 1"	805604015

«Breakaway» reconnection fireproof valves

Designed to be installed in fuel supply hoses and they will be disconnected when there was a strong pull. They automatically stop the flow of fuel.

COMPONENTS

- › Zinc die-cast body
- › Viton main seals
- › Stainless steel main spring
- › POM guide and poppet
- › PA66 protective sleeve

	Flow	Connection	
«Breakaway» reconnection valve	0-60 l/min	BSP 3/4"	805604019
PA-80 «Breakaway» swivelling valve	-	F1"	805604026

«Breakaway» fireproof valve for supply kits with submersible pumps

Mandatory for the installation of fuel supply kits equipped with a submersible pump. Installed at the base of the supply kit so that in the event of accidental start-up, fuel spillage is avoided. They automatically stop the flow of fuel.

COMPONENTS

- › Cast iron body
- › Buna-N joints

	Flow	Pressure	Connection	
«Breakaway» valve for supply kits	0-120 l/min	2 bar	FF1 1/2"	805603010

Fire shut-off plugs

Plug for threaded installation in the vent pipe of a tank. It has a fire protection grid to prevent the spread of fire.

	Connection	
Brass fire shut-off plug	F1 1/4"	801900002
Brass fire shut-off plug	F1 1/2"	801900001
T brass fire shut-off plug	F2"	801900004

Angle check valves

Valves to be installed in the suction tube, in the top of the underground storage tanks.

	Connection	Weight	
Angle check valve	M2" or F1 1/2" IN · F1 1/2" OUT	1.6 kg	805603011
Angle check valve	FF2"	3.89 kg	805605002

Adjustable anti-siphon valves

Valves with adjustable security system for tanks with different diameters in order to avoid the liquid pouring by gravity in the event of breaks or leakages in the installation. It acts like a check valve that guarantees the suction tube is not unprimed.

	Connection	
Adjustable anti-siphon valve	F1"	805604010
Adjustable anti-siphon valve	F1 1/4"	805604011
Adjustable anti-siphon valve	F1 1/2"	805604028
Adjustable anti-siphon valve	F2"	805604013

31 /
Accessories

2" Overfill valve

Valve to prevent fuel spillage due to overfilling of the air tanks.
It is installed in the refuelling hose. This valve shuts off the liquid flow when the product level is close to its full capacity, causing a few hose strokes and a reduction in flow, which means that the supply has to be cut off. The lower valve diameter is for the 2" discharge pipes.

- COMPONENTS
- › Special key for an easy installation

	Connection	
2" Overfill valve	M2"	801904014

4" Overfill valve

2-stage shut-off valve to prevent overfilling of above ground and underground tanks with a capacity of more than 3,000 litres. They close automatically when the product level reaches 92% of capacity. The lower valve diameter is designed for 4" discharge pipes.

4" Overfill valve	801904013
-------------------	-----------

Charging holes

	Connection	
Charging hole MB+VK	F2"	800600001
Charging hole MB+VK	F3"	800600002
Charging hole plug MB+VK	M3"	800602001

Manhole containers

This tank box allows the installation of pumps, valves and other equipment required to connect the tank to the supply kit.

- TECHNICAL DATA
- Material:** polyethylene
Ø Manhole: 820 mm

- COMPONENTS
- › Two pieces: base and neck, joined with a ring, assuring its total sealing

	Dimensions (approx.)	Weight	
Manhole container	Ø1,165x1,225 mm	55 kg	808313003
Plus manhole container	Ø1,165x1,500 mm	65 kg	808313006

Spill trays

Leakproof containers to retain fuel stored in the tank in the event of a leak. Suitable for tanks of 1,000 litres or less.

TECHNICAL DATA

Material: 0.8 mm galvanised steel sheet

	Dimensions (approx.)	Weight (approx.)	
Tray A	1,680x750x160 mm	12 kg	385905015
Tray B	1,220x690x160 mm	10 kg	385905016
Tray C	810x810x160 mm	8.5 kg	385905017
Tray D	2,300x810x160 mm	20 kg	385905033

31 /
Accessories

Plastic funnels

Made of polypropylene, specially suitable for the hydrocarbon and chemical product handling (ask for other liquids).

	Ø exterior	Ø interior	
Plastic funnel	255 mm	245 mm	460000000
Plastic funnel	160 mm	150 mm	460500000
Plastic funnel	75 mm	70 mm	460100000
3-funnel set with joint	-	-	460700000

TECHNICAL DATA

Sieve material: 350 µm stainless mesh

Optional

Sieve (Ø255 & 160 mm) · Ø50 mm ext. · Ø40 mm int.	460000003
3-funnel joint	469000000

Spill containers

Designed to prevent product spillage in the area of filling connections and vapour outlets in underground storage tanks during normal filling operations. Easy to install. Its flexible structure allows it to adapt to any type of ground. Allows the product to be drained from the container into the underground tank.

TECHNICAL DATA

Connection: 4"
Capacity: 19 L
Weight: 25-28.5 kg

COMPONENTS

- › Cast iron and fibreglass cover (depending on the model)
- › Cast iron mounting ring
- › Polythene bellow
- › Compound fibre base
- › Stainless steel brackets
- › Buna-N seals

	Ø cover	Dimensions (approx.)	
Spill container fibre cover	360 mm	Ø360x410 mm	808313001G
Spill container steel cover	360 mm	Ø360x410 mm	808313004
Spill container steel cover	410 mm	Ø435x390 mm	808313005

32 / Additive dispenser

P. 40 → Electronic displays

Additive dispenser 230 VAC

Dispensing and inject additive to the fuel. It can be used in petrol stations, logistic tanks or charge boards. Configure the percentages of additive corresponding to each type of fuel.

TECHNICAL DATA

Flow:	6-50 l/h
Supply accuracy:	±1 %
Ambient temperature:	0 °C / +45 °C
Max. pressure:	3 bar
Max. height suction tube:	1.5 m
Protection:	IP-55
Dimensions (approx.):	450x270x405 mm

COMPONENTS

- › Injection pump
- › Electronic heading to configure the percentages of additive
- › Metallic cabinet with lock
- › 1 m suction tube
- › 2 m delivery tube

Additive dispenser	33411-CF00000
Additive dispenser with trolley and 230 VAC cable reel	33420-CF00000

33 / Extractors

Debowser

15/60 l/min

230 · 230/400 VAC

Simple or double fuel extraction kits with ATEX components, special for the extraction of diesel, petrol and kerosene.

P. 40 → Electronic displays

P. 90 → Hoses & suction kits

Ⓢ DIESEL
Ⓢ PETROL

TECHNICAL DATA

Suction flow:	15/60 l/min
Accuracy:	±2 %
Ventilation:	Embedded
Dimensions (approx.):	800x400x1,500 mm
Weight (approx.):	157 kg

COMPONENTS

- › Chassis in steel, stainless steel and aluminium with treatment to maximise corrosion protection and weatherproof
- › Weatherproof
- › One or two suction pumps with meter
- › GE electronic display or GK-7Plus controller
- › 4 m Ø1/2" suction hose for diesel or petrol with ball valve
- › Suction probes
- › Empty manometer

LG-84 Electric extractor

Electric extractor for extraction of water from the bottom of tanks. Also for the cleaning of manholes.

TECHNICAL DATA

Flow:	35 l/min
Motor:	0.25 kW
Consumption:	1.2-2 A
Motor speed:	3,000 rpm
Protection:	IP-55
Pressure/Depression:	+0.9/-0.7 bar
Max. vessel capacity:	60 L
Max. admissible capacity:	50 L
Dimensions (approx.):	475x520x865 mm
Net weight (approx.):	42.5 kg

COMPONENTS

- › Vacuum gauge -1 +3 bar
- › FF3/4" ball valve
- › Level buoy (overflow security)
- › 5.5 m transparent hose with 1/2" metallic galvanised lance
- › 0.75 m M3/4" complete drain probe
- › 1.5 m Ø12x9 mm tank extraction tube
- › 1.5 m Ø8x6 mm tank extraction tube
- › Stainless grid
- › Breakaway valve
- › Chassis with handle and back wheels

FUNCTIONS

- › **Extraction of water from the bottom of tanks**
Suction of water, sludge and impurities from all types of above-ground or underground tanks. Water suction without creating turbulences, which prevents the water from remaining in suspension.
Quick separation of the suctioned liquid by decantation, with the possibility of returning the clean liquid to the same tank and the contaminated liquid to the authorised containers.
- › **Cleaning of manholes**
Suction of liquids and sludge in manholes. It easily sucks up sludge, hydrocarbon water and dirt left at the bottom of manholes.

LG-84 Electric extractor		Fluids	
		D	480000000
Optional			
① Air output tube adapter (service station)			480105010
Water paste · water level indicator			807613001

LGN-65 Pneumatic extractor

33 /
Extractors

Pneumatic extractor without electric connection for extraction of water from the bottom of tanks. Also for remove fuel from vehicles and cleaning of manholes.

- DIESEL
- PETROL

TECHNICAL DATA

Required air flow:	200 l/min at 6 bar
Suctioned flow:	400 l/min
Tank vacuum:	-0.8 bar
Positive pressure in the tank:	up to 0.9 bar
Suction capacity:	6 m
Capacity:	50 L
Dimensions (approx.):	550x510x1,140 mm
Net weight (approx.):	36.45 kg

COMPONENTS

- › Vacuum gauge -1 +3 bar
- › Level indicator
- › Tank for the extracted fuel
- › Transparent vessel with protective metal housing
- › Earth connection
- › 5.5 m transparent hose with 1/2" metallic galvanised lance
- › 0.75 m M3/4" complete drain probe
- › 1.5 m Ø12x9 mm tank extraction tube
- › 1.5 m Ø8x6 mm tank extraction tube
- › Chassis with handle and back wheels

FUNCTIONS

- › **Extraction of water from the bottom of tanks**
Suction of water, sludge and impurities from all types of above-ground or underground tanks. Water suction without creating turbulences, which prevents the water from remaining in suspension.
Quick separation of the suctioned liquid by decantation, with the possibility of returning the clean liquid to the same tank and the contaminated liquid to the authorised containers.
- › **Remove fuel from vehicles**
Quick and effective solution for vehicles that have been refueled with the wrong fuel. Suction by means of extraction probes inserted into the vehicle tank.
- › **Cleaning of manholes**
Suction of liquids and sludge in manholes. Easily sucks sludge, hydrocarbonated water and dirt from the bottom of manholes.

LGN-200 Pneumatic multi-use extractor

Equipment for the extraction, storage, filtration and later supply of fuels.
Specially suitable for “rent a car” companies.

TECHNICAL DATA

Required air flow:	200 l/min at 6 bar
Suctioned flow:	400 l/min
Tank vacuum:	-0.8 bar
Positive pressure in the tank:	up to 0.9 bar
Capacity:	200 L
Dimensions (approx.):	950x950x1,615 mm
Net weight (approx.):	135 kg

COMPONENTS

- › Vacuum gauge -1 +3 bar
- › Integrated tank of 200 L capacity
- › Transparent vessel of 10 L capacity with built-in microfilter
- › Water-repellent paper filter of 5 µm
- › Earth connection
- › Lower valve for the total empty of the tank and liquid analysis
- › Level indicator
- › MGE-40 electronic gear meter
- › PA-60 automatic nozzle
- › 5.5 m transparent hose with ½" metallic galvanised lance
- › 1.5 m Ø12x9 mm tank extraction tube
- › 1.5 m Ø8x6 mm tank extraction tube
- › 4 m Ø20 mm transparent hose
- › Chassis with handle and wheels

FUNCTIONS

- › **Extraction, storage, filtering and subsequent supply of fuel**
The fuel is extracted from the vehicles. It is filtered and then it can be supplied with the same equipment by means of the built-in nozzle and supply meter. The supply can be controlled by the meter or the lower valve without any metering. It allows the conservation of the vacuum/pressure inside to extract/vacuum in places where there is no air intake.

05 / Manual pumps

BP-5 · Manual lever pump

Manual lever pump for the transfer of diesel or lubricant from metallic drums of 50 to 200 litres.

TECHNICAL DATA

Transfer capacity: 300 ml x piston-stroke

COMPONENTS

- › Pump made of steel, aluminium, zinc, brass, NBR
- › 870 mm metallic suction telescopic tube with 3/4" connection to the pump
- › 1 1/2" or 2" connection adaptable to metallic drums from 50 to 200 litres

	Fluids	
BP-5 · Manual lever pump		040100000

BMP · Manual piston pump

Manual piston pump of double action suitable for diesel, oil, fuel and alcohol.

TECHNICAL DATA

Transfer capacity: 800 ml x piston-stroke

Inlet · Outlet connection: 1" · 3/4"

COMPONENTS

- › 2.5 m Ø3/4" hose
- › Drum plug adjustable at 2"
- › 1 m Ø33.5" suction tube
- › Heavy-duty steel handle
- › Nozzle hanger

	Fluids	
BMP · Manual piston pump		040200000

BRM-88 · Rotary aluminium pump

**Self-suction rotary blade pump.
Adaptable to drums from 50 to 200 litres.**

TECHNICAL DATA

Transfer capacity: 2.85 L x 20 rounds

Net weight (approx.): 6.6 kg

COMPONENTS

- › 970 mm Ø32 mm suction tube
- › Ø25 mm discharging tube
- › M2" adapter adjustable in height for the drum fixation
- › Aluminium die casting steel handle
- › Viton joints

FGR-25 heater filter

Aluminium filter for lubricants. It is easy to install and its maintenance is simple.

TECHNICAL DATA

Flow:	82 l/min
Filtration range:	300 µm
Inlet · Outlet connection:	F1"

COMPONENTS

- › Body made of injected aluminium alloy
- › Inner electric resistance of 230 VAC 300 W
- › Adjustable thermostat from 20 to 90 °C, in case there is product prewarming
- › Regenerating filtering stainless steel cartridge
- › Sealing with NB 100/70 DIN3535 Nitrile rubber joints

FILKIT LUBE

20 l/min	230 VAC
----------	---------

Mobile filtering kit for the filtration of solid impurities and water absorption in lubricants.

TECHNICAL DATA

Free flow:	20 l/min
Dimensions (approx.):	600x500x1,000 mm
Net weight (approx.):	24.5 kg

COMPONENTS

- › EA-88 0.37 kW 230 VAC self-suction gear pump
- › 2x SPIN-ON microfilters with differential manometer (1 cartridge of 25 µm + 1 cartridge of 10 µm water absorbent)
- › SPIN-ON headings with 1 1/4" BSP inlet-outlet connections and 1 1/2" 16 UN or 1 1/4" BSP filter connection
- › Metallic trolley
- › FUP-1 filter
- › F1" BSP Shutoff valve in the pump inlet and in the filter outlet

Cloud Software

DieselPlus

The DieselPlus licence allows to access the cloud software from any device with the Internet connection.

Controle console

Control console GK-7PlusM that sends, wirelessly, the data of each supply to DieselPlus cloud software (two models available).

Module with GE display

It connects up to one hose per module and it shows the supplied volume in the display. It can be combined with the other modules.

x4 hose module

It connects up to 4 hoses. Connect it to a display to view the volume of 4 hoses simultaneously. It can be combined with the other modules.

Hose module

It connects up to one hose to the control console. It can be combined with the other modules.

Supply control system

Composed of a solenoid valve and a pulser. It is required one for hose.

Pump trolley

Trolley for pumps of different sizes.

TECHNICAL DATA

Platform size (approx.): 480x205 mm

Pump trolley	807900003
--------------	-----------

C-50 trolley for 50 kg drums

Trolley for 50-60 kg drums for the lubrication and grease kits.

COMPONENTS

- › 2 fixed wheels
- › 2 rotary wheels
- › Support for the assembly of a pneumatic pump

C-50 trolley	686100000
--------------	-----------

CE-200 trolley for 185 kg drums and a hose-reel

Trolley for 185 kg drums with tubular frame.

COMPONENTS

- › 2 fixed wheels
- › 1 rotary wheel
- › Security strap for the drum to avoid any accidental leak
- › Built-in hooks to reel the cable
- › Built-in back platform for the assembly of a hose-reel

CE-200 trolley	686400100
----------------	-----------

Metallic protective holder

Metallic holder with drip tray to be installed on polyethylene tanks of 1,000 L with metal tubular framework for all type of assemblies and pumping kits. It is also available made of galvanized steel.

	Dimensions (approx.)	
Metallic protective holder	170x1,105x605 mm	126801001

Pump bracket handle

Handle with lower support to be fitted to gear pumps for an easy handling.

Pump bracket handle	030003001
---------------------	-----------

Wall oil dripping holder

Metallic nozzle holder with drip tray.

	Dimensions (approx.)	
Wall oil dripping holder	150x150x600 mm	240200001

Mixed wall non-drip support

Metallic holder with drip tray to hang 2 nozzles and the probe-carrier tubes. It can be fixed on the wall or on the ground.

	Dimensions (approx.)	
Mixed wall non-drip support	300x100x1,200 mm	800405007

Swinging bracket for hose-reels

Zinc-plated wall bracket to move the hose-reel in the desired position.

Adjustable bracket for hose-reels	240500000
-----------------------------------	-----------

Pneumatic pump wall support

Zinc-plated support to install the pneumatic pumps on the wall.

LUBRICANT

Supply portico

Compact kit ready for its direct installation, specially suitable for the installation that have buried their pipes.

TECHNICAL DATA

Dimensions (approx.): 1,100x250x2,100 mm

COMPONENTS

- › 3 x cased hose-reel with 10 m hose
- › 3 x PMGE-40 electronic nozzle-meter
- › Drip pan
- › Base to be directly anchored to the ground
- › Lateral where to place the pipes
- › 1 hose-reel extension (maximum 2 hose-reels per portico)

Supply portico with 3 hose-reels	220400000
----------------------------------	-----------

Supply portico with own consumption controller

Compact kit with GK-7M controller that communicates with the GKSuite software. The controller allows the supply only to authorised users through PIN code or iButton. It transfers the supplies done by each user, the type of lubricant, the supplied litres, the date and hour... SQL data base for its easy and quick connection to ERP systems or another management software.

COMPONENTS

- › GK-7M controller of users and supplies that communicates with the GKSuite software installed in a PC
- › Supply portico with 3 hose-reels
- › 3 x MGI-40 pulsers
- › 3 x 1/2" solenoid valves
- › 3 x supply electronic displays

Supply portico with 3 hose-reels + GK-7M	220500000
--	-----------

PFP panel for pneumatic pumps and/or hose-reels

Special support to fix the pneumatic pumps and/or hose-reels (up to 4 units) in the workshop or the working zone, simplifying the installation. Wall-assembled.

PFP panel	205300000
-----------	-----------

Fleet controllers

01 / GK-7 & GK-7M own consumption controllers

The GK-7 · GK-7M own consumption controllers allow you to manage all the supplies of your installation.

With communication to the desktop software GKSuite through a communication kit.

- ✓ **Identification**
 - › Identification of users and/or vehicles through codes and/or identification keys
- ✓ **Volume preset**
 - › Supply with or without volume preset
- ✓ **Total control**
 - › With the controllers and the software GKSuite you can manage supplies, users, vehicles and levels of your tanks
- ✓ **Control from your PC**
 - › Consult and manage all the data through the GKSuite software installed on your PC
- ✓ **Communication kit**
 - › Transfer the data with a communication kit that suits the needs of your installation
- ✓ **Automatic communication**
 - › Transfer the data manually or configure GKSuite to communicate automatically

GK-7 & GK-7M

Controllers with the GKSuite software. The GK-7 own consumption controller manages all the supplies of your dispenser through a communication kit. The GK-7M multi-hose consumption controller manages the supply of up to 16 dispensers via a communication kit.

02 / GK-7 communication kits

Choose a communication kit that includes the GKSuite software and the required converter to connect the GK-7 controller to your PC.

GK-7 communication kits

ZIGBEE-USB (wireless)

It connects the dispenser via radio with a converter in the PC that is connected through a USB port.

COMPONENTS

› ZigBee converter + ZigBee-USB + GKSuite SQL or C/S Software

ZIGBEE-USB (wireless) · SINGLE-POINT	257180000
ZIGBEE-USB (wireless) · CLIENT-SERVER	257600700

ZIGBEE-ETHERNET (wireless)

It connects the dispenser via radio with an Ethernet converter that can be connected to any LAN port of the net.

COMPONENTS

› ZigBee converter + ZigBee-Ethernet + GKSuite SQL or C/S Software

ZIGBEE-ETHERNET (wireless) · SINGLE-POINT	257190000
ZIGBEE-ETHERNET (wireless) · CLIENT-SERVER	257600500

MEMORY KEY (iButton)

Place the key in the controller to automatically upload and load the data. PC connection through USB converter.

COMPONENTS

› USB converter + Memory key + GKSuite SQL or C/S Software

MEMORY KEY (iButton) · SINGLE-POINT	257120000
MEMORY KEY (iButton) · CLIENT-SERVER	257600200

USB cable

It is required a 4x0.25 mm communication cable between the PC and the controller.

COMPONENTS

› 485/USB cable converter + GKSuite SQL or C/S Software

USB cable · SINGLE-POINT	257160000
USB cable · CLIENT-SERVER	257600100

ETHERNET cable

It allows connecting the controller to the computing network as if it was another PC more in the installation. It allows the connection in Wi-Fi , VPN or WAN. It is required a 4x0.25 mm communication cable between the converter and the controller.

COMPONENTS

- › ETHERNET converter + GKSuite SQL or C/S Software

ETHERNET cable · SINGLE-POINT	257130000
ETHERNET cable · CLIENT-SERVER	257600300

GSM

The communication is made through SMS messages. A data SIM card must be installed in each and every one of the modems.

COMPONENTS

- › GSM modem converter for the dispenser + GKSuite SQL or C/S Software
- › It is required to have a GSM modem in the PC. SIM card and modem not included.

03 / GK-7Plus & GK-7PlusM own consumption controllers

The GK-7Plus · GK-7PlusM own consumption controllers allow you to manage your installation. Totally online, in a centralised way. With automatic and wireless communication to the DieselPlus cloud software.

- ✓ **Identification**
 - › Identification of users and/or vehicles through codes and/or identification key
- ✓ **Volume preset**
 - › Supply with or without volume preset
- ✓ **Total control**
 - › With the controllers and the DieselPlus cloud software you can manage supplies, users, vehicles and levels of your tanks
- ✓ **Anytime, anywhere**
 - › Consult and manage all the data totally online with the DieselPlus cloud software
- ✓ **Wireless**
 - › Wireless communication to PC · M2M · «on demand» management software
- ✓ **Automatic communication**
 - › The equipment communicates each supply directly to DieselPlus cloud software

GK-7Plus & GK-7PlusM

Controller with the DieselPlus cloud software without any additional communication kit. The GK-7Plus own consumption contoller manages all the supplies of one dispenser. The GK-7Plus M multi-hose own consumption controller manages the supplies of up to 16 dispensers.

Memory and ID system options for GK-7 & GK-7Plus

These options of memory and ID systems are available for all the controllers and dispensers with GK-7 or GK-7Plus display. The memory of 60 users/vehicles and the identification key reader (iButton) are already included in the equipment.

Options of user/vehicle memory

Memory of 60 users/vehicles · 200 services (GK-7) · 1,000 services (GK-7Plus)	Included
Memory of 130 users/vehicles · 500 services (GK-7) · 1,000 services (GK-7Plus)	FE007002
Memory of 1,000 users/vehicles · 1,000 services	FE007003

iButton ID system

Identification key reader (iButton)	Included
GK-7 identification key (pack of 10 units)	251201002

Other ID systems

Proximity card reader (RFID)	FE017002
Magnetic card reader	FE017003
TAG reader with spiral cable	FE017004
TAG wireless reader	FE017005
Proximity card	803304015
Magnetic card	251201004
TAG fixed disc identifier	251201006
TAG keyring identifier	251201005

Software

01 / GKSuite

GKSuite is the desktop software for the management of supplies, users, vehicles and levels of your tanks. Access the software from your PC or server and control the supplies and levels of your installation.

- ✓ **Automatic communication**
 - › Bidirectional communication that can be made manually or automatically
- ✓ **Communication kit**
 - › Required a communication kit for the connection of the controller to GKSuite
- ✓ **Manage your fleet and tanks**
 - › Consult and manage all the data from the software installed on your PC or server

GK SUITE

GKSuite Desktop Software

01 /
GKSuite

FUNCTIONALITIES

P. 168 → Memory and ID system options for GK-7 & GK-7Plus

Stock control

Consult the litres in the tank and their cost. View the theoretical level or the real one installing the Genius level indicator.

Client-server version

The GKSuite C/S version is prepared for its installation on a server to allow simultaneous access by different users.

Integrations

It is possible to access other software (ERP, PowerBI, ODBC, etc.) to the GKSuite C/S database without any API database.

OPTIONS AND TOOLS

Alarm configuration

Configure warnings for irregular use, programmed actions, when the minimum level has been reached, when the tank has been filled or other indicators you need.

Supply list and reports

Lists of the supplies and their real cost. Customise them by user, vehicle or group. All the data can be exported to files with *.csv or *.txt format.

Users, vehicles and operators

Establish a hierarchical level of users with restricted accesses and privileges. Assign limits, regular consumption or fluids to be supplied to the vehicle or user.

02 / DieselPlus

DieselPlus is the cloud software for the management of supplies, users, vehicles and levels of your tanks. Access the software from any device with Internet connection and have total control of the supplies and levels of any type of fluid.

- ✓ **Automatic and wireless**
 - › Wireless installation and communication M2M with the DieselPlus servers
- ✓ **Any type of supply**
 - › Control the supplies and levels of any type of fluid or granular solid
- ✓ **Total control of your fleet and tanks**
 - › Access the software anytime and anywhere from any device with Internet connection

DieselPlus Cloud Software

02 /
DieselPlus

FUNCTIONALITIES

Control of supplies

Manage all the supplies and levels of any type of fluid or granular solid on your installation, workshop or mobile kit. Control installations placed in different geographical zones and remotely access the dispenser to start a supply.

Tank levels

Control the level of your tanks from any device with an Internet connection. Connect our level gauges to DieselPlus to check your tank levels anywhere, anytime. Configure alarms and tasks so you do not run out of fuel.

Consumption control

Find out the exact consumption of your vehicles by integrating your geolocators in DieselPlus and detect irregularities. The software will get the mileages done during the supply and will calculate the consumption.

Integrations

Manage your fleet from your own ERP or accounting system. The DieselPlus API synchronises the DieselPlus information with your software automatically, without any manual exportation.

DIESELPLUS⁺

The image illustrates the DieselPlus Cloud Software ecosystem. It features a desktop monitor displaying a web interface with a table of supply data, including columns for date, time, location, and quantity. Below the monitor is the DieselPlus logo. Underneath the logo are three smartphones displaying the mobile app interface, which includes tank level gauges and consumption charts. At the bottom is a diagram showing the DieselPlus API connecting to various systems: SAP, Oracle, and Microsoft Dynamics 365.

02 /
DieselPlus

OPTIONS AND TOOLS

Alarm and task
configuration

Program tasks and notes so that DieselPlus warns you via email. Configure warnings by date or mileages, by fillings or emptyings and irregular consumptions.

Reports

Discharge lists and statistics for an easy interpretation and export them in *.pdf, *.csv or *.txt. Automatically receive the lists you require in your email.

Access control
based on roles

Establish a hierarchical level of users with restricted accesses and privileges: administrator, end user... Each user is able to access only the assigned tasks.

Additional fields

Do you want to know the number plate related to a supply? Define which questions the dispenser should make and DieselPlus will create the additional fields.

Remote access to
the dispenser

Start a supply remotely from any device with Internet connection.

Geolocator
integration

Find out the consumption of each vehicle and detect irregularities by integrating your geolocators in DieselPlus. The software will calculate the consumption.

Safe data

Any data is automatically sent to the DieselPlus servers, minimising risks of losing data because of a breakdown in the dispenser or the IT equipment of the end user.

Automatic updates

The last software version is always available without any intervention or additional cost.

Online and
phone help

Solve any doubt in a personalised way with our technical department.

Genius level indicator

GKSuite · DieselPlus

1% accuracy (in height)

Level monitor in atmospheric tanks. Suitable for liquid with a maximum viscosity of 30 cSt. The level measurement is made by measuring the static pressure of the liquid height through a tube into the tank.

TECHNICAL DATA

Accuracy:	1% (in height)
Resolution:	5 mm
Max. tank height:	4 m
Level reading:	in height (mm or inches) or volume (litres or gallons)
Protection:	IP-55
Power:	230 VAC · 110 VAC · 12-32 VDC
Communication to external device:	via MODBUS RTU
Connection to DieselPlus via RS-485 cable:	up to 16 Genius connected to the same Tank Modem Plus
Connection to GKSuite:	with a communication kit (USB cable, Ethernet cable, ZigBee-USB or ZigBee-Ethernet)

COMPONENTS

- › Control unit with LCD display and 5-key keyboard to access the kit menu
- › Indicator set with full tank alarm, empty tank alarm and power
- › 10 m of tube (extending at 50 m maximum) of Ø6 mm with Ø25 mm weight
- › Cable 230 VAC 50/60 Hz · 110 VAC · 15-32 VDC
- › Connection cable of the two outputs for full or overfilled tank alarm and empty or minimum level
- › RS-485 communication cable
- › Acoustic alarm in its inner of 90 dB and 2,400 Hz

Genius 15-32 VDC (suitable for diesel and other non-corrosive fluids)	25737-CF00003
Genius 110 VAC (suitable for diesel and other non-corrosive fluids)	25737-CF00006
Genius 230 VAC (suitable for diesel and other non-corrosive fluids)	25737-CF00000
Genius-Inox 230 VAC (suitable for AdBlue/DEF or Phytosanitary fluids)	25737-CF00002
Genius-Lube 230 VAC (suitable for lubricant with 30-1,000 cSt viscosity)	25737-CF00001

02 / Tank Modem Plus Kit

Tank Modem Plus Kit

GPRS communication

automatic & wireless

Communication kit that connects the Genius level indicator and other compatible gauges with the DieselPlus cloud software. The communication with the software is automatic and wireless through GPRS communication.

03 / Dolphin

P. 173 → DieselPlus
Cloud Software

Dolphin gauge

- GPRS communication
- ±1% accuracy
- automatic & wireless

Level gauge that automatically measures the level fluid of your tank and automatically sends the data to the DieselPlus cloud software. Easy, quick and wireless installation thanks to its compact design and internal battery.

TECHNICAL DATA

Accuracy:	± 1% mm (in the level tank height)
Standard resolution:	5 mm
Measuring range:	100-4,000 mm
Reading frequency:	1 transmission per hour
Power supply:	3.6 V lithium battery
Protection:	IP-65
Working temperature:	-10 °C / +50 °C
Installation:	2" M thread or 4-screw fixation
Connection to DieselPlus via GPRS:	automatic and wireless communication
Dimensions (approx.):	100x100x215 mm
Weight (approx.):	0.40 kg

COMPONENTS

- › Internal lithium battery of easy user-replacement 4-year estimated life

GPRS Dolphin gauge	258200300
Dolphin DieselPlus annual licence	670800500

ATG Ex level gauge

communication via RS-485 cable ±0.5 mm accuracy

P. 173 → DieselPlus
Cloud Software

P. 177 → Tank Modem
Plus Kit

Level gauge that detects the level of water and fuel. Suitable for all type of fuel without float change. Measurement by mangnetostrictive technology. It calculates the product level, the water presence and the product temperature.

TECHNICAL DATA

Accuracy:	±0.5 mm
Standard resolution:	±0.01 mm
Temperature accuracy:	± 0.5 °C
Power supply:	9-30 VDC (via an external power supply)
ATEX Category:	Ex db IIB T6 Ga/Gb · Ex tb IIIC T85 °C Db
Working temperature:	-20 °C / +60 °C
Connection:	2"
Measure range:	500 - 5,500 mm
Connection to DieselPlus via RS-485 cable:	up to 16 gauges connected to the same Tank Modem Plus

COMPONENTS

- › 1 fuel float
- › 1 water float
- › 2" riser or adjustable connection to the tank
- › Explosionproof stainless steel IP-68 rated case

ATG Exd level gauge (customised size)	
Tank Modem Plus Kit (antenna + support + SIM) · 110/230 V	258000000

Optional	
485/USB cable converter (required to configure the modem locally when remote communication is not possible)	251208032
Power supply IN 100-240 VAC* > OUT 12 VDC (required to connect more than one gauge to the same modem)	802501004

05 / Radar level gauge

P. 173 → DieselPlus
Cloud Software

P. 177 → Tank Modem
Plus Kit

Radar level gauge

communication via RS-485 cable

±2 mm accuracy

Level gauge for large height tanks. Valid for fluids and granular solids. Ideal for level measurement in water treatment and for maintenance-free use on small bulk silos. Mesurement by radar signal.

TECHNICAL DATA

Accuracy:	±2 mm
Measuring range:	up to 15 m
Voltage:	8-30 VDC
Protection:	IP-66 / IP-68
Ambient temperature:	-40 °C / +80 °C
Output signal:	digital signal according to EIA-485 normative
Data protocol:	2-thread Modbus
Bottom / top thread:	M1 ½" BSP / M1" BSP
Pressure:	-1 +3 bar
Connection to DieselPlus via RS-485 cable:	up to 16 gauges connected to the same Tank Modem Plus

COMPONENTS

- › Gauge
- › 4-thread axial cable output

1 ½" 15 m · Radal level gauge	25834-CF00000
1 ½" · 15 m · ATEX Radar level gauge	25834-CF00002

07 /

Level detectors and indicators

Level indicator

Tank fuel height gauge suitable for aerial tanks with a diameter not higher than 2,000 mm. Weatherproof and easy assembly. It does not need any maintenance.

COMPONENTS

- › Float to put into the tank joined to the indicator through a thread
- › Indicator expressed in centimetres
- › Two scales easy exchangeable: one for heights of 150 cm and one for 250 cm
- › Easily accessible maximum/minimum position adjustment

1 1/2" level indicator	801901001
------------------------	-----------

Acoustic overfilling alarm

Luminous and acoustic alarm of the maximum tank level of any liquid fluid, water, diesel, etc. It is suitable for the tank filling warning up to a predetermined level.

Acoustic overfilling alarm	801904008
----------------------------	-----------

Level switch

Custom-built switch that allows the automated control of the filling and emptying of one or more tanks. It can activate or control pumps, electrovalves, optical and acoustic alarms.

Max. Min. Level switch IP-55	808316042
Max. Min. Level switch EExd	808316005

Leak detector

Security and control system that links the easiness with the usefulness. It detects the presence of liquid with its infrared sensor, activating or deactivating the device.

TECHNICAL DATA

Inlet:	110 to 230 VAC
Max. consumption:	10 mA
Max. intensity in relay:	8 A

COMPONENTS

- › Free voltage relay
- › Visual alarm (red LED · 5 mm)
- › Starting Visualization (green LED · 5 mm)

Leak detector	808302007
---------------	-----------

Vacuum leak detector

Detector for the integrally-banded tanks according to the EN 13160-1, Class 1 Regulation. Suitable for diesel buried and aerial tanks in an atmospheric pressure with a diameter not higher than 2,900 mm. It creates a depression of -400 mbar between the inner wall and the exterior one of the tank. The alarm activates when the depression decreases.

TECHNICAL DATA

Acoustic emission:	min. 70 db(A)
Max. relay intensity:	2 A · 250 VAC (resistive)
Pump stop:	-410 to -450 mbar
Pump start:	-380 mbar
Alarm activation:	-325 to -355 mbar
Working temperature:	-5 °C / + 50 °C
Voltage:	100 - 240 VAC ±10 %
Power:	10 VA
Protection:	IP-30
Electromagnetic compatibility:	EN 61000 noise immunity · CISPR22 interference
Dimensions (approx.):	202x70x230 mm
Net weight (approx.):	1.1 kg

DFV · Vacuum leak detector	808302006

BRM-88 Ex · Rotary aluminium pump	31	Metallic cabinets for microfilters	50	TOTEM K	71
BRM-88 · Rotary aluminium pump	31	Metallic tube suction kits	91	TOTEM M	62
BT-87 · Drill pump	31	MG-80	32	TOTEM Plus	72
Cabinets for external use	99	MG-80A · MG-84A	33	Transfer and filtering portable kits · 12 VDC	61
Cartridge spares	50	MGE-40	34	Transparent vessel filter	46
CG-150 230 VAC	28	MGE-110	35	Truck Kit · 12/24 VDC	60
CG-400HD Ex 230 VAC · 230/400 VAC	29	MGE-250	36	Universal support	98
CG-900HD Ex 230 VAC · 230/400 VAC	29	MGE-400	36	Vertical kits	21
CG-1000 230 VAC · 230/400 VAC	28	MGE/I-110	39	Wall kits	19
CG-1600 230/400 VAC		MGI-40	37	Wall support	98
Charging holes	102	MGI-110	37	'Y' brass filters	46
Check valve with or without York base filter	46	MGI-250	38	York base filters	46
COMPACT E	65	MGI-400	38		
COMPACT GE	65	MGI-800 12 VDC	39		
COMPACT K	66	M-Meters versions	44		
COMPACT M	62	M-Meters with dessager and prefilter	43		
COMPACT Plus	67	M-Meters with GK-7Plus	45		
Debower	105	Mobiltank · GRG steel tanks	94		
Diesel battery kit	23	Mobiltank supply kits	94		
Display E	40	Monsterpump-200 24 VDC · 230 VAC	13		
Display GE 12/24 VDC · 110/230 VAC	41	Multivalent vessel filter	46		
Display GK-7 12/24 VDC · 110/230 VAC	41	Nozzle hangers	98		
Double BAG-800 kit 230 VAC · 230/400 VAC	16	PA-60 · Automatic nozzle	88		
EGC Series	92	PA-80 · Automatic nozzle	89		
FG-70	48	PA-120 · Automatic nozzle	88		
FG-100	47	PA-140 · Automatic nozzle	89		

Alphabetical product index

AdBlue / DEF

AdBlue/DEF hose-reels	130
AdBlue trolley kit	115
BD-30 12/24 VDC	110
BD-30 110/230 VAC	110
BDP Stainless Steel diesel motor	111
BDP Stainless Steel electric motor IP-55	111
BDP Stainless Steel hydraulic motor	112
BDP Stainless Steel without motor · 1 or 2 shafts	112
BlueBox EX-A	131
BlueBox EX-F	131
BlueBox EX-S	131
Blue-Kits	132
BMP-BLUE	113
COMPACT Blue E	123
COMPACT Blue GE	123
COMPACT Blue K	124
COMPACT Blue Plus	124
FG-100Blue	120
FG-450Blue	121
FUP-1Blue	121
Kits for drums or tanks	114
M-50 INOX	119
MG-80	115
MGE-40Blue · MGE-110Blue · MGE-400Blue	116
MGE/I-110Blue	118
MGI-40Blue	117
MGI-110Blue	117
MGI-400Blue	118
PA-60U · Automatic nozzle	130
Polytank Blue	132
PT-60 · Manual nozzle	130
SP-80 230 VAC	113
TOTEM Blue E	126
TOTEM Blue GE	127
TOTEM Blue K	128
TOTEM Blue Plus	129

Lubricant

1,000 L tank kit · direct top suction	139
1,000 L tank kit · lower suction	139
200 L drum kit with hose-reel	138
Adapter nut for 1,000 L tank	159
Adapter plug for 1,000 L tank	159
Automatic high capacity hose-reel	156
BDP Lube	141
BMP · Manual piston pump	142
BP-5 · Manual lever pump	142
BRM-88 · Rotary aluminium pump	142
Bung adapters	159
C-50 trolley for 50 kg drums	157
Cased hose-reels with and without hose	156
CE-200 trolley for 185 kg drums and a hose-reel	157
DAE-1000 · 1,000 L tank kit	139
EA-65 230 · 230/400 VAC	136
EA-88 0.37 kW · 0.74 kW 230 VAC with pressure switch	135
EA-88 0.37 kW 230 VAC · EA-88 0.74 kW 230 VAC	134
EA-90 12/24 VDC	135
FG-300x2+EA-88 mobile filtering kit	149
FGR-25 heater filter	148
FILKIT LUBE	149
FUP-1 filter	148
KDE-200 · 200 L drum kit	138
KEB1-200 · 200 L drum kit	138
Kits with electronic meter	137
Metallic protective holder	158
Metallic tube suction kits	155
Metallic tube suction kit with adapter plug	155
MGE-40	143
MGE-110	144
MGE-250	145
MGE-400	145
MGE/I-110	146
MGI-40	146
MGI-110 · MGI-250 · MGI-400	147
Mixed wall non-drip support	158
Open hose-reels with and without hose	156
P-100 · Manual high flow nozzle	154
PFP panel for pneumatic pumps and/or hose-reels	160
PG-40 · Manual nozzle	154
PMGE-40 · Electronic nozzle-meter	154
Pneumatic pump wall support	158
Pump bracket handle	158
Pump trolley	157
Self-suction pumps · other options	136
Springwel hoses	155
Suction/delivery hoses	155
Supply control for workshops	153
Supply portico	160
Supply portico with own consumption controller	160
Swinging bracket for hose-reels	158
TOTEM Lube	151
Universal support	159
Universal zinc-plated hook set	159
Wall oil dripping holder	158
'Y' brass filters	148
York base filters	148

Fleet controllers

GK-7 communication kits	164
GK-7 & GK-7M	163
GK-7Plus & GK-7PlusM	167
iButton ID system	168
Options of user/vehicle memory	168
Other ID systems	168

Software

DieselPlus Cloud Software	173
GKSuite Desktop Software	171

Level gauges

Acoustic overfilling alarm	183
ATG Ex level gauge	179
Dolphin gauge	178
Genius level indicator	176
Leak detector	184
Level indicator	183
Level switch	183
Radar level gauge	180
Tank Modem Plus Kit	177
TLC-485	181
TLC-Bluetooth Ex	182
Vacuum leak detector	184
